## EDUCATIONAL BACKGROUND

### **Lethbridge Polytechnic**

*Computer Information Technology – 2 Year Diploma : GPA: 3.2/4.0*

**Lethbridge, Alberta**

**Relevant Coursework:** Networking/Network security, Windows Server Administration, Programming in C++, C#, Java, HTML/CSS, JavaScript, PHP, SQL, Windows OS, Linux OS, SDLC & System Troubleshooting.

## PROJECTS

- ❖ **Windows Server 2019 College Network Infrastructure Project:** Designed and implemented a network infrastructure using two Windows Server 2019 virtual machines to simulate a real-world college IT environment.
  - Configured Active Directory Domain Services (AD DS) with OUs, security groups, and user accounts to establish a structured and secure network environment.
  - Deployed Distributed File System (DFS) for fault-tolerant file sharing, synchronized using replication across multiple servers.
  - Applied Group Policy Objects (GPOs) to enforce program-specific restrictions, folder redirection, and system customizations for users.
  - Managed printer services, set up network and local printers, and deployed access permissions via GPO for seamless user integration.

**Technologies:** Windows Server 2019, Active Directory Domain Service, DFS, GPOs, DNS, Static IPs,

- ❖ **Office Network Design and Implementation:** Designed and implemented a secure, scalable, and fault-tolerant office network infrastructure, incorporating wired and wireless connectivity, server configurations, and network security measures.
  - Network Infrastructure Planning: Developed a comprehensive network wiring plan and topology

incorporating CAT6 cables, fiber optics, and wireless access points for connectivity across all office sections.

- Hardware Configuration: Installed and configured routers, switches, and wireless access points to ensure seamless communication between different network segments and devices.
- Server Setup: Deployed and configured DHCP, DNS, and backup servers to handle IP

address allocation, name resolution, and data redundancy effectively.

- Network Security and Testing: Integrated firewalls for secure internet access and performed end-to-end testing of all network devices and connections to ensure proper functionality and fault tolerance.

**Technologies:** CAT6 Cables, Fiber Optics Cabling, Routers, Switches, WAP, DHCP, DNS, Firewalls, Network Design and Visualization Tools (MS Visio)

## WORK EXPERIENCE

### Security Guard

*Paladin Security | Lethbridge | July 2023 – Present*

- Responsible for checking to see that site policies and procedures are adhered to, while ensuring guards are following contractual obligations.
- Ensure all staff members receive adequate and sufficient information to commence duties at sites.
- Monitor, identify and report any health and safety deficiencies on their sites, and instruct all staff in good work safe practices.
- Ensure the Guards Orientation Check List is completed within the allotted time frame.
- Provides guards with continued and adequate training as it relates to the duties and responsibilities of the position.
- Ensure new guards have read and signed the required acknowledgements for the Site Orders, the Security Guard Training Manual, and the OH&S Manual.
- Monitor and identify any staff training or disciplinary issues that arise, bringing them to the attention of the appropriate Manager
- 

### Computer Technician

*DELL | Dubai | September 2019 – March 2021*

Installs, maintains, and repairs computer hardware and software while providing technical support and troubleshooting for IT issues. Below are the tasks and achievements for this role.

- **Performed installation, maintenance, and repair** for complex internal computer hardware and software applications, achieving a 95% first-time fix rate for technical issues.
- **Installed Microsoft Windows** on over 100 desktop and laptop computers, ensuring timely updates and activation, with a 98% success rate for account setups (Microsoft and Google).
- **Configured computer networks and internet connectivity** for small businesses, successfully connecting an average of 10 devices per site and improving network efficiency by 20%.
- **Conducted virus and malware removal** services, restoring functionality to over 30 systems monthly, with a 90% customer satisfaction rate for post-service follow-ups.
- **Managed data backup, recovery, and file sharing solutions**, ensuring data integrity for clients, with a success rate of 99% in recovery scenarios.
